

Upgrade Solution

What is a Focus 2 ?

The Focus 2 series was an analog DC motor speed control manufactured by Emerson Industrial Controls from approximately 1982 to 1998. It was available in 2 standard ranges that could control DC Shunt Wound or Permanent Motors from 1/4 to 5HP from single phase 120vac or 240vac power.

What replaces the Focus 2 ?

We no longer manufacture nor participate in the single-phase DC drive side of the business which spans ¼ thru 5HP. We recommend contacting Minarik Drives for their selection of [Minarik DC drives](#) to replace the Focus 2.

A good point of contact for the Minarik Drives DC series is Brandon Jones.
Brandon Jones can be reached at the following:
